

Olamide Oludipe

Software Engineer · AI Data Annotator · Technical Content Evaluator

Upper Marlboro, MD, USA · easyceecce@gmail.com · +1 301 905 2630

PROFESSIONAL SUMMARY

I bring over a decade of hands-on experience across software engineering, IT operations, and structured data work. In recent years I have gone deep on AI and NLP - Transformers, LLMs, and LangChain - and that combination puts me in a strong position for annotation and content evaluation work. I understand how language models behave, what a good response looks like, and why quality at the data level matters.

My background covers data entry and management, asset and inventory tracking, ticketing systems, and technical troubleshooting. All of it demands accuracy, consistency, and the discipline to follow detailed guidelines without shortcuts. I have worked independently in remote environments for years and know how to keep output quality high without needing hand-holding.

I am actively contributing to AI annotation and response evaluation projects on Outlier, Alignerr, OneForma, DataAnnotation.tech, Prolific, handling both technical and general tasks with the same standard of care either way.

WORK EXPERIENCE

Freelance AI Data Annotator & Evaluator Jan 2026 - Present

Outlier / Aligner / Prolific / DataAnnotation.tech · Remote

- Evaluate and rank AI-generated responses across text, code, and instruction-following tasks using structured rubrics and detailed guidelines.
- Complete coding annotation tasks in Python, JavaScript, and SQL, drawing on real software engineering experience to assess correctness and quality.
- Write clear evaluation justifications and rubric explanations, applying technical documentation skills to annotation feedback.
- Maintain consistency and accuracy across high-volume task queues in self-directed remote workflows.

Full-Stack Developer Jun 2025 - Dec 2025

AMA Fashion · UK / Dubai · Remote

- Built and tested a production-grade e-commerce platform, applying structured logic, edge-case handling, and system reliability standards.
- Produced analytics integrations and automated reporting workflows, maintaining close attention to data accuracy and process consistency.

Frontend Developer Jun 2025 – Dec 2025

Oregon Co. Jewelry E-Commerce · Remote

- Delivered a pixel-perfect, production-ready web application following precise design specifications and strict instruction adherence.
- Resolved technical issues systematically and documented solutions clearly for future reference.

Backend Developer (Freelance) Apr 2025

Healthcare Appointment & Payment System · Remote

- Architected secure, logic-driven backend systems requiring careful adherence to business rules and edge-case accuracy.

- Wrote structured technical documentation covering complex payment and authentication workflows.

Backend Developer (Freelance) Jan – Mar 2025

Wekume · Chat Platform · Library API · Remote

- Delivered secure, well-documented APIs across multiple domains, maintaining consistency across concurrent projects.
- Applied AI content moderation to a real-time chat service, gaining practical exposure to AI output quality and safety considerations.

Backend Developer Intern Oct – Dec 2024

InternPulse · Remote

- Built APIs for library, healthcare, and inventory management systems, following structured technical briefs with accuracy and thoroughness.

Senior Warehouse Technician Jun 2023 – Dec 2023

22nd Century Technologies · Alexandria, VA

- Managed precise data entry and verification of incoming and outgoing IT equipment using asset management systems.
- Conducted systematic inventory control across high-volume daily operations, identifying and documenting discrepancies.
- Followed structured operational procedures and asset tracking guidelines, maintaining compliance across complex multi-step workflows.
- Coordinated with internal and external contacts to ensure accurate scheduling and documentation of equipment logistics.

Datacenter Logistics Coordinator Jan 2023 – Jun 2023

HCLTech · Ashburn, VA

- Maintained accurate records of asset locations and movements within the data center, ensuring real-time database integrity.
- Enforced DC Asset Management policies and SOX Operational controls, upholding strict compliance and documented guidelines.
- Managed and resolved tickets in the asset management queue using systematic troubleshooting and structured decision-making.
- Generated precise shipping documentation and tracked orders to ensure accurate, timely delivery.

Data Center Technician Jan 2021 – Dec 2022

EzBlockchain · Johnson, KS

- Recorded and verified hardware assets into databases using manufacturer, model, and serial number data.
- Conducted inventory control and reported discrepancies between physical items and inventory records.
- Accepted and documented tasks through a ticketing system, maintaining clear records across simultaneous workflows.
- Diagnosed and resolved network and server issues following structured technical procedures.

EDUCATION

BSIT, Information Technology 2019

[Colorado Technical University-Colorado Springs](#)

Information Technology Tools and Applications

IT Professional Training2022

Peloton College · Dallas, TX

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, R

AI / ML: LLMs, NLP Pipelines, Transformers, LangChain, Hugging Face, Prompt Design

Backend: Node.js, Express, REST APIs, Authentication & Payment Systems

Frontend: React, HTML, CSS, Responsive Design

Data & Analytics: pandas, NumPy, Tableau, Power BI, Excel (Advanced)

Tools: Git, Jupyter Notebook, Ticketing Systems, Asset Management Platforms

Annotation Platforms: Outlier, Alignerr / Labelbox, OneForma, DataAnnotation.tech, Prolific, Handshake

CERTIFICATIONS & TRAINING

- Complete AI Engineer Training - Python, NLP, Transformers, LLMs, LangChain, Hugging Face (In Progress)
- Backend Development - Univelcity
- Data Analytics - One Campus Academy
- Accenture North America Virtual Internship
- CompTIA Security+ (In Progress)
- Asset Management & SOX Operational Controls - HCLTech (On-the-Job)
- Data Center Operations & Structured Cabling - EzBlockchain

LANGUAGES

English – Fluent (primary working language)
